Research Papers

Kinetics of *recB*-dependent repair: Relationship to post-UV inactivation of the prophage (MTR 06222)
by Ž. Trgovčević, D. Petranović, E. Salaj-Šmic and M. Petranović (Yugoslavia) 1

Induction of *umu* gene expression by cross-links and other DNA lesions (MTR 06225)
by T. Ohnishi, S. Iwamoto, K. Ikai-Tano and K. Nozu (Japan) 7

Frameshift mutagenesis by nitracrine analogues in wild-type, uvrB, polA and recA strains of *Salmonella typhimurium*, with and without plasmid pKM101 (MTR 06227)
by L.R. Ferguson and P.M. Turner (New Zealand) 13

Comparison of the *rep-38* and *mmrA1* mutations of *Escherichia coli* (MTR 06228)
by R.C. Sharma and K.C. Smith (U.S.A.) 23

Radiation sensitivity of fibroblast strains from patients with Usher's syndrome, Duchenne muscular dystrophy, and Huntington's disease (MTR 06220)
by J. Nove, R.E. Tarone, J.B. Little and J.H. Robbins (U.S.A.) 29

Activation of alternative sites of replicon initiation in Chinese hamster cells exposed to ultraviolet light (MTR 06221)
by T.D. Griffiths and S.Y. Ling (U.S.A.) 39

Formation of DNA strand breaks in UV-irradiated human fibroblast preparations (MTR 06224)
by W.K. Kaufmann and L.P. Briley (U.S.A.) 47

Involvement of DNA polymerases in the repair of DNA damage by benzo[*a*]pyrene in cultured Chinese hamster cells (MTR 06226)
by T. Ishiguro, F. Otsuka, T. Ochi and M. Ohsawa (Japan) 57

Announcement 65

Meeting Report

Molecular aspects of DNA repair (MTR 06244)
by E.C. Friedberg, C. Backendorf, J. Burke, A. Collins, L. Grossman, J.H.J. Hoeijmakers, A.R. Lehmann, E. Seeberg, G.P. Van der Schans and A.A. Van Zeeland
Report of a workshop held at Noordwijkerhout (The Netherlands) 1–5 March 1987, Organized by P.H.M. Lohman, J.W.I.M. Simons, D. Bootsma, J.H.J. Hoeijmakers, B.A. Bridges, P. Van de Putte and A.J. Van der Eb 67

Research Papers

Recombinational repair of hydrogen peroxide-induced damages in DNA of phage T4 (MTR 06237)
by D. Chen and C. Bernstein (U.S.A.) 87

Sodium arsenite inhibits spontaneous and induced mutations in *Escherichia coli* (MTR 06232)
by T. Nunoshiba and H. Nishioka (Japan) 99

DNA repair in lymphocytes from young and old individuals and from patients with Alzheimer's disease (MTR 06230)
by T.A.D. Smith, D. Neary and R.F. Itzhaki (Great Britain) 107

Abnormal mutation frequencies in human repair-defective hybrid cell lines (MTR 06231)
by R.T. Johnson, I. Rasko and A.R.S. Collins (Great Britain) 113

Expression of the truncated *E. coli* O^6-methylguanine methyltransferase gene in repair-deficient human cells and restoration of cellular resistance to alkylating agents (MTR 06233)
by K. Ishizaki, T. Tsujimura, C. Fujio, Z. Yangpei, H. Yawata, Y. Nakabeppu, M. Sekiguchi and M. Ikenaga (Japan) 121

Repair of benzo[*a*]pyrene-initiated DNA damage in human cells requires activation of DNA polymerase alpha (MTR 06234)
by C.O. Joe, V.L. Sylvia, J.O. Norman and D.L. Busbee (U.S.A.) 129

Characterization of a CHO variant in respect to alkylating agent-induced biological effects and DNA repair (MTR 06235)
by R. Goth-Goldstein and M. Hughes (U.S.A.) 139

0167/8817/87/$3.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

Hypersensitivity of Bloom's syndrome fibroblasts to *N*-ethyl-*N*-nitrosourea (MTR 06236)
by T. Kurihara, M. Inoue and K. Tatsumi (Japan) 147
Studies of gene transfer and reversion to mitomycin C resistance in Fanconi anemia cells (MTR 06238)
by M. Buchwald, J. Ng, C. Clarke and G. Duckworth-Rysiecki (Canada) 153
Comparative analysis of O^6-methylguanine methyltransferase activity and cellular sensitivity to alkylating agents in cell strains derived from a variety of animal species (MTR 06239)
by M. Ikenaga, T. Tsujimura, H.-R. Chang, C. Fujio, Y.-P. Zhang, K. Ishizaki, H. Kataoka and A. Shima (Japan and China) 161
The endogenous nuclease sensitivity of repaired DNA in human fibroblasts (MTR 06240)
by A.N. Player and G.J. Kantor (U.S.A.) 169
Announcement 179

Research Papers
Effects of the *Escherichia coli recF* suppressor mutation, *recA801*, on *recF*-dependent DNA-repair associated phenomena (MTR 06250)
by M.R. Volkert and M.A. Hartke (U.S.A.) 181
Effect of ultraviolet radiation on the *Bacillus subtilis* phages SPO2, SPP1 and Φ29 and their DNAs (MTR 06248)
by A.G. Freeman, K.M. Schweikart and L.L. Larcom (U.S.A.) 187
Induction and repair of closely opposed pyrimidine dimers in *Saccharomyces cerevisiae* (MTR 06252)
by R.J. Reynolds (U.S.A.) 197
Enzymatic studies of DNA repair in *Drosophila melanogaster* (MTR 06249)
by W.A. Deutsch (U.S.A.) 209
Single-strand DNA breaks in rodent and human cells produced by superoxide anion or its reduction products (MTR 06245)
by M.L. Cunningham, J.G. Peak and M.J. Peak (U.S.A.) 217
Differential sensitivities of transformed and untransformed murine cell lines to DNA cross-linking agents relative to repair of O^6-methylguanine (MTR 06253)
by T. Yagi and R.S. Day III (U.S.A.) 223
RecA-like activity in mammalian cell extracts of different origin (MTR 06241)
by K. Kenne and S. Ljungquist (Sweden) 229
Reparative strand incision in saponin-permeabilized human fibroblasts (MTR 06246)
by W.K. Kaufmann and L.P. Briley (U.S.A.) 237
Exogenous O^6-methylguanine inhibits adduct removal and sensitizes human cells to killing by the chemical carcinogen *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine (MTR 06251)
by M.A. Babich and R.S. Day III (U.S.A.) 245
Unique cross-link and monoadduct repair characteristics of a xeroderma pigmentosum revertant cell line (MTR 06242)
by L. Vuksanovic and J.E. Cleaver (U.S.A.) 255
Defective DNA excision repair in cells of patients with homocystinuria (MTR 06247)
by T.A. Sinelshchikova, G.N. Lvova, N.N. Shoniya and G.D. Zasukhina (U.S.S.R.) 265
The fate of 8-methoxypsoralen-photoinduced DNA interstrand crosslinks in Fanconi's anemia cells of defined genetic complementation groups (MTR 06243)
by D. Papadopoulo, D. Averbeck and E. Moustacchi (France) 271
